

OSDU Forum Member Meeting Monday, November 3, 2025

CST	Topic	Presenter(s)	Description	Room
09:00	Introduction	Justin de Grande, The Open Group		
09:05	OSDU Overview	Tim Hunter-Rowe, bp, and Jan Harald Mortensen, Equinor	Business and Technical Overview of the OSDU Forum	
09:40	OSDU Forum Presentation and Q&A	Zak Kerls, Chevron; Pierrick Gaudin, TotalEnergies; Jennifer Rainey, ExxonMobil; Kathryn Fletcher, SLB	Dynamic Reservoir Modelling Presentation	
10:30	Break			
11:00	Energistics Update/Keynote/Presentations	Steve Daum, PDS; Lars Olav Grovik, Equinor; and David Johnson, Petrolink	Keynote and update – 35 years anniversary The Energistics Consortium, it's start and evolution Energistics Standards (WITSML, PRODML, RESQML, ETP, PWLS, Unit of Measure) How these standards serve the industry, and how they are leveraged by other standards, such as in the OSDU Data Platform. Why Energistics is valid today and where it is going	
	Data Definitions Leaders	Data Definitions Leaders	Data Definitions leaders will meet to prepare a recap the data definition summit from the previous week.	
12:30	Lunch			
2:00	Global Awards	Steve Nunn, The Open Group CEO		
3:30	Break			
4:00	Global Awards	Steve Nunn, The Open Group CEO		
5:00 – 7:30	Awards Networking Reception			

Invitation only PMC Leadership Meeting on Monday from 9am to 12.30pm

OSDU Forum Member Meeting Tuesday, November 4, 2025

CST	Topic	Presenter(s)	Description	Room
09:00	Welcome	Steve Nunn, The Open Group CEO		
09:05	Introduction, Housekeeping, and Agenda	Justin de Grande, The Open Group		
09:15	Chevron Keynote Presentation	Stan Jayr, Chevron		
09:35	OSDU Leadership Update	Forum Leadership	Update on the recent changes in the OSDU Forum and plans for the next six month	
09:55	Premium Sponsor Presentation	AWS		
10:00	Strategic Roadmap and Objectives and Key Results	Forum Leadership	Presentation on the current roadmap for the OSDU Data Platform and the Forum Objectives and Key Results (OKRs)	
10:25	Premium Sponsor Presentation	S&P Global		
10:30	Break			
11:00	Presentations 3 x 30 mins	Paula Doyle, Aker BP; Jamie Cruise, SLB; David Butcher, Halliburton and Sverre Brandsberg, Microsoft Tim Hunter-Rowe, bp Kadri Umay, Microsoft and Reishin Toolsi, Databricks	Collaborative Well Planning in Aker BP: Interoperability between SLB and Halliburton Accelerating Business Decisions through Trusted Data delivered through a Platform-wide Data Quality and Technical Assurance Framework Enabling Analytics Workloads on the OSDU Platform with Azure Databricks - Experience from Real World Engagements	
	PMC and Data Definitions	Pierrick Gaudin, Total Energies and Jenni LaRue, Chevron	This will be a cross-domain discussion between the PMC and Data Definitions.	
	Energistics Track	Dennis Stevens, The Open Group	Energistics Strategy Session	
12:30	Lunch			
2:00	Presentations 3 x 30 mins	Leigh Slattery, Chevron Jan Harald Mortensen, Equinor Rodrigo Miranda, PETROBRAS	Transforming Wellbore and Data Management in Chevron Shale and Tight Assets Enabled by the OSDU Platform Establishing Trust in OSDU Data: Referential Integrity Schema Validation and AI-driven Quality Rules in a Lakehouse Architecture PETROBRAS and the OSDU Journey - Standardizing Data Access and Integration for Enhanced Efficiency	

	OSDU Analytics and AI	Gareth O'Brien, Microsoft	In this session, we will transition from charter to action. We will recap the SIG's scope and guardrails, review key personas and their AI enablement needs, and delve into priority use-case families: AI-assisted data governance, AI-ready seismic workflows, and AI for DevOps automation. Your input will be instrumental in shaping the shortlist of use cases and the artefacts essential to making AI on the OSDU platform simple and repeatable.	
	Data Definitions and Architecture	Justin Walker, Chevron and Jenni LaRue, Chevron	Topic: Cross Domain Data Consumption	
	Energistics Track		Energistics Project Updates	
3:30	Break			
4:00	Business Model & Outreach	Curley Thomas III, Chevron	This session will focus on continuing to build a solid data foundation with standards, and an AI/ML foundation to support the overall strategy of the OSDU Forum. We will discuss what's working well, how we leverage the marketplace and how we educate the broader community on the value of the OSDU Data Platform	
	Journey to Venus Update	Pierrick Gaudin, TotalEnergies and Nishita Sannala, Microsoft	After a long phase of planning, the PMC engine has been turned on, and the Rocket has taken off. This session will share the latest update of PMC Targets from the Road to Venus, where we are in the action plan, as well as the expected next phases of the flight	
	Capability Portfolio and Data Definitions	Tim Hunter-Rowe, bp and Jenni LaRue, Chevron	Aligning seismic interpretation use case requirements with existing data models to identify and resolve gaps—ensuring a unified, end-to-end workflow across Data Definitions and Capability Portfolio	
	Energistics Track		Energistics Next Steps	
5:30	Close and Networking Reception			

OSDU Forum Member Meeting Wednesday, November 5, 2025

CST	Topic	Presenter(s)	Description	Room
09:00	Introduction, Housekeeping, and Agenda	Justin de Grande, The Open Group		
09:05	Readouts from the Previous Day	Work Group and Session Leads	Data Definitions, Analytics and AI	
09:25	Launch of the OSDU Technical Standard	Curley Thomas III, Chevron	Update on the launch of the OSDU Technical Standard and upcoming Certification initiatives	
09:50	Premium Sponsor Presentation	Google		
09:55	Journey to Venus Presentation	Pierrick Gaudin, TotalEnergies	Update on the Journey to the Venus release	
10:25	Premium Sponsor Presentation	SLB		
10:30	Break			
11:00	Presentations 3 x 30 mins	Agni Das, AWS and Dr Tung Thanh Nguyen, Petro Vietnam Institute Marcus Ridgway, Shell and Randy Petit, Shell Raghd Gadrabough, Viridien	Unlocking Petrophysical Insights: An OSDU-integrated Gen-AI Agent for Well-Log Analysis in the Vietnam Petroleum Institute One Source of the Truth for Well Headers and Wellbores Mastership Change to the OSDU Platform Next Generation Evergreen Data Solution for Continuous Subsurface Transformation into the OSDU Platform	
	Forum Coordination Team	Stef Jacobs, OSDU Forum Chair		
	Energistics Track	Robert Schave, Bardasz	WITSML Technical Deep Dive for Projects	
12:30	Lunch			
2:00	Presentations 3 x 30 mins	Sharad Agrawal, Adapts Carolyn Squires, Halliburton Jess Kozman and Debasis Chatterjee, Katalyst Data Management	From Code to Knowledge with AI: Empowering OSDU Developers Digital Communication Between OSDU, Non OSDU, and Disconnected Systems Using OSDU Schema Accelerating the Adoption of a Search and Order Portal for Mineral Exploration Data	
	EDS	Ashish Saxena, Accenture	Introduction to EDS Key insights from the EDS Survey Roadmap and next steps Challenges, best practices, and future enhancements with the community Interactive Q&A	
	Capability Portfolio	Tim Hunter-Rowe, bp	Exploring how the OSDU platform delivers measurable value to Operators by advancing priority capabilities, driving user adoption, and aligning on a strategic roadmap for workflow enablement	
	Training and Bootcamp Working Session	Jan Mortesen	The mission of our working group is to enhance user understanding of the OSDU Data Platform, data definitions and technical standards. We	

			recognize the challenges faced by individuals seeking to grasp these concepts. To address this, we are committed to simplifying the learning process by offering an accessible, hands-on experience, empowering anyone to navigate the OSDU Data Platform effectively. • Collaborate with the OSDU ecosystem to create and validate the standardized training material • Define strategy for maintaining updated training material as OSDU evolves and further matures • Define the format – documentation, video or hands on sessions– for the training • Define persona Based modules for the training	
	Energistics Track	Craig Bye, Pason Systems	WITSML Technical Deep Dive for Projects continued	
3:30	Break			
4:00	Operator Connect (Operators Only)	Huub Streng, TotalEnergies	The Operator Connect is an OSDU Forum Special Interest Group with the objective to improve collaboration and identify common needs between operators, driving quicker platform capability progress and OSDU adoption.	
	Standards and Certification	Curley Thomas III, Chevron	In this session we would like to take a deep dive into the Data Platform Standard Version 1.0. The goal is to share what it really means and what do we need to prioritize for the next version. Additionally, we want to review where we are with the Certification Program which includes the Verification Matrix and the associated Test Scripts.	
	Mining SIG		The Mining Special Interest Group (SIG) will present an overview of the features and benefits, operating model, and future vision for the SIG. This will be followed by a Q&A and whiteboarding session.	
	Geospatial Consumption Zone	Christina Dischinger, ExxonMobil and David Jacob, ESRI	This session introduces the Geospatial Consumption Zone (GCZ) , a modernized framework within the OSDU Data Platform that transforms how geospatial data is enabled and consumed across diverse energy industry workflows. From exploration and development to emerging energy solutions, the GCZ bridges the gap between raw spatial data and actionable insights. Discover how it supports integration with GIS platforms, spatial analytics tools, and domain-specific applications. We'll dive into key architectural components, subsurface data user customizations, and real-world use cases that highlight how the Consumption Zone promotes data interoperability, empowering cross-domain collaboration and accelerating decision-making.	
	Energistics Track	Robert Schave, Bardasz	WITSML Technical Deep Dive: WITSML v1.4.1.1 & v2.1 Conversion Rules	
5:30	Close			

OSDU Forum Member Meeting Thursday, November 6, 2025

CST	Topic	Presenter(s)	Description	Room
09:00	Introduction, Housekeeping, and Agenda	Justin de Grande, The Open Group		
09:05	Readouts from the Previous Day	Work Group and Session Leads	EDS, Capability Portfolio, Standards and Certification, GCZ	
09:30	OSDU Leadership Q&A – OMC and PMC Sneak Peek	Leadership	OSDU Requirement Intake and Delivery Process Presentation followed by OMC and PMC Q&A Session	
10:20	Premium Sponsor Presentation	Microsoft		
10:25	Premium Sponsor Presentation	Hitachi Digital Services		
10:30	Break			
11:00	Presentations 3 x 30 mins	Camilo Angarita, AkerBP David Johnson, Petrolink Kay Sutter, EPAM Systems	OSDU Portal: A Python based Workbench for Early Phase Data Engineering on the OSDU Data Platform From Legacy Tables to OSDU Objects: A Journey of Adoption and Acceleration Redefining Excellence through the OSDU Data Platform - Integrating Data, Decisions, and Business Practices like Never Before	
	Enterprise Architecture	Einar Landre, Equinor	EA will host a working session addressing the role of EA in context of the forum adopting software product management practices and its collaboration with other work groups	
	Geophysics	Abhi Goswami, Shell		
	Energistics Track	Tabu Qureshi, Halliburton	AI and Analytics	
12:30	Lunch			
2:00	CCUS/OFP/Energistics Harmonization	Jane Wheelwright, DGI	Overview of OSDU CCUS, Past and Present, and Harmonization Group including work by OFP and Energistics. Interoperability between OFP and OSDU Data Models illustrating end-to-end Carbon counting solutions. Update, discussion and prioritization of relevant DDMS Introduction to and application of the publicly available Decatur dataset	
	OSDU Technical Capability Definition	Pierrick Gaudin, TotalEnergies	We have been running with contribution of capabilities for a while without formalized expectations and obligations. This caused a waste of effort and delays in many places. Based on these facts, raised at the last F2F - a first attempt of a resolution has been handled on the DDMS case. We now have Obligation Document & Definition of Done available for the Community. This session is set to read it back to the	

			community, for a common awareness - as well as answering questions and collecting feedback	
	Production DDMS	Debasis Chaterjee, Katalyst Data Management	Production DDMS – progress and status of two Contributions - “Core” and “Historian” Data Model – progress Status of testing Related topics – Tabular data, Time Series data	
	Energistics Track		Energistics Wrap Up and Close	
3:30	Break			
4:00	Closing Session			
4:30	Close			

**OSDU Forum Member Meeting
 Friday, November 7, 2025**

CST	Topic	Presenter(s)	Description	Room
09:00	Technical Bootcamp Training Session	Jan Harald Mortensen, Equinor Keith Armstrong, EPAM	From Insight to Impact – Mastering the OSDU Data Platform <i>The next edition of the OSDU Bootcamp, a hands-on, high-impact workshop designed to help you deepen your understanding of the OSDU Data Platform and apply it confidently in your day-to-day work.</i> Whether you're returning to build on previous learnings or joining us for the first time, this bootcamp is your gateway to mastering the tools and concepts that make OSDU platform a game-changer for subsurface data management. You'll gain practical experience with key features like Frame of Reference, Technical Assurance, hands on usage of DDMS (wellbore and reservoir), and explore how to integrate your data and applications with the OSDU Data Platform. This year's session will again offer access to a live OSDU environment, which is going to be available for a time period after the event, so you can continue exploring even after the event ends. Preparation: You will be notified about pre-reads and technical setup instructions in advance	
2:00	Close
